

# FileNet Developer

## **COMPANY DESCRIPTION**

Pyramid Solutions is a recognized leader in software engineering and systems integration. We implement solutions that are a combination of our products, 3rd party products and our professional services. Our staff consists of software engineers and project managers, who bring significant domain knowledge to our areas of business focus.

Pyramid Solutions has a proven history of success. We've achieved honors, such as being selected for the Michigan Private 100, Greater Detroit Future 50 hot list of fastest-growing companies and have been selected as one of the 101 Best and Brightest Companies to Work for in Metro Detroit.

## **JOB DESCRIPTION**

Pyramid Solutions is looking for a FileNet Developer to join our growing Professional Services and Product Development organization to provide best-in-class technology services to our Enterprise Content Management customers. The successful candidate will have a proven track record delivering software solutions to external customers.

As a FileNet Developer you will be responsible for the design, development, testing, release and support of solutions for several industries, including Financial Services, Insurance, State and Local Government. You will be involved in developing solutions using industry leading Enterprise Content Management (ECM), Case Management, Business Process Management (BPM) and Advanced Capture technologies from IBM, Microsoft, Hyland, EMC and Kofax. An ability to transfer knowledge to other team members in a variety of communication forms (Blog, Wiki, Presentations, Tutorials, etc) is extremely desirable.

## **RESPONSIBILITIES**

- \* Responsible for design, development, testing, delivery, and support of FileNet solutions
- \* Participate in requirements gathering with customers
- \* Assist Solution Architects in solution design
- \* Author software documentation including design specifications, test plans and user documentation
- \* Attain and maintain expertise in the latest IBM FileNet products (training is company provided)

## **QUALIFICATIONS**

- \* Experience in FileNet development and/or deployments
- \* Excellent understanding of the C# language and .NET
- \* Strong comprehension of Microsoft Development technologies
- \* Ability to develop using Test Driven Development with automated unit testing
- \* Strong analytical thinking and problem solving skills
- \* Excellent verbal/written communications skills and customer skills
- \* Professional, accountable, reliable, driven, team player
- \* Attention to detail, quality and the customer
- \* Passionate desire to learn the new products from IBM
- \* Experience in Java & VB6 is also a plus
- \* BS Degree is required (Software Engineering, Computer Science or related degree)
- \* 3+ Years of work experience developing software solutions
- \* Must be willing to travel 15-25%
