

.NET Software Developer

COMPANY DESCRIPTION

Pyramid Solutions is a recognized leader in software engineering and systems integration. We create and deploy solutions through software development and the integration of our products and key third party products. Our comprehensive technical staff, consisting of software engineers and project managers, brings significant domain knowledge to our areas of business focus.

Pyramid Solutions has a proven history of success. We've achieved honors, such as being selected for the Michigan Private 100, Greater Detroit Future 50 hot list of fastest-growing companies and have been selected as one of the 101 Best and Brightest Companies to Work for in Metro Detroit.

JOB DESCRIPTION

Pyramid Solutions is looking for a .NET Developer to join our growing Product Development and Professional Services organization to provide best-in-class technology services to our Enterprise Content Management customers. The successful candidate will have a proven track record developing software products or solutions delivered to external customers.

As a .NET Developer, you will be responsible for the design, development, testing, release and support of products and solutions that are sold and used across several industries. The products are used for Enterprise Content Management (ECM) and Business Process Management (BPM) solutions, such as mortgage underwriting, claims processing and accounts payable processing. The ideal candidate will have strong .NET software development experience (object oriented design, patterns, SOA) especially with developing & consuming web services. In addition to solid software development skills, it is highly desirable that the candidate have experience developing software for ECM or BPM implementations. An ability to transfer knowledge to other team members in a variety of communication forms (1-on-1, Group Sessions, Blog, Wiki, Forums, Email, Samples, Tutorials, etc) is extremely desirable.

- * Responsible for development, testing, delivery, and support of .NET products and solutions using a Test Driven Development methodology
- * Participate in the design phase for .NET development projects
- * Build Rich Internet Applications using Silverlight within the Expression Studio product suite
- * Develop WCF clients for consumption of ATOM feeds containing domain specific entities
- * Extend functionality of web applications parts by utilizing JavaScript & Silverlight
- * Author software documentation including interface specification, API references, and user guides
- * Maintain expertise in the latest tools & frameworks applicable to development, primarily in .NET
- * Produce, maintain, & enforce a set of best practices in developing and delivering .NET products & solutions

QUALIFICATIONS

- * Experience in .NET, WCF, ASP.NET, ADO.NET, Enterprise Library
- * Passionate desire to learn the newer .NET technologies: Silverlight, WPF, MEF, ASP.NET MVC, ASP.NET AJAX, Entity Framework, Dynamic Data, etc (existing experience a large plus)
- * Experience or familiarity with the Expression Studio most importantly in Expression Blend
- * Excellent understanding of the C# language
- * Ability to develop using Test Driven Development with automated unit testing
- * Strong comprehension of other .NET languages: XAML, VB.NET, F#, J#, IronPython, or IronRuby, etc
- * Desire to teach & impart knowledge to other team members
- * Ability to think & decide in the abstract
- * Development experience in JavaScript, DHTML, XML, XSL, SQL, Oracle
- * Experience with web services including SOAP, WS-*, REST, JSON, ATOM, RSS
- * Understanding of browser based patterns like Cross Site Requests, Cookies, HTTP requests, HTTP proxies
- * Strong analytical thinking and problem solving skills
- * Excellent verbal/written communications skills and customer skills
- * Professional, accountable, reliable, driven, team player
- * Attention to detail, quality and the customer
- * Some experience in Java & VB6 is also a plus
- * Artistic ability a major plus
- * BS Degree is required (Software Engineering, Computer Science or related degree)
- * 3+ Years of work experience developing .NET software solutions
- * Must be willing to travel 15-25%
